1903.
Strength
and Sustenance

—the very embodiment of both in a handy, digestible form—is Bovril. It has every virtue a true food should possess—it is a stimulant, a warmth-giver, a nourisher, and thoroughly digestible. Those to whom strength and endurance are a vital necessity, such as businessmen, travellers, explorers, etc., will find in Bovril a true friend. It keeps the body in the very pink of condition.
